Dear Mohsen,

I noticed your paper, "Finite element simulation of two-dimensional pulsatile blood flow through a stenosed artery in the presence of external magnetic field (Article)" published in International Journal of Computational Methods in Engineering Science and Mechanics. I think your work may relate to the conference I am chairing, the 4th International Symposium on Energy Challenges and Mechanics (11th-13th August 2015, Aberdeen, Scotland, United Kingdom)

<http://nscj.co.uk/ecm4/sessions.html>

You might like to contribute a talk to Session 14: Porous materials for energy applications

<http://nscj.co.uk/ecm4/sessions/session14.html>

or Session 18: Mechanics of nanoporous materials for energy applications

<http://nscj.co.uk/ecm4/sessions/session18.html>

We still consider abstracts submitted before 15 June 2015.

Regards,

Henry.
